

DBA xPress Installation

Last Modified on 01 June 2021

Update: SolarWinds DBA xPress is now a **FREE** tool. In versions 2021.8 and later it is a standalone product and no longer requires a license.

Download: See the [DBA xPress product page](#) to learn more.

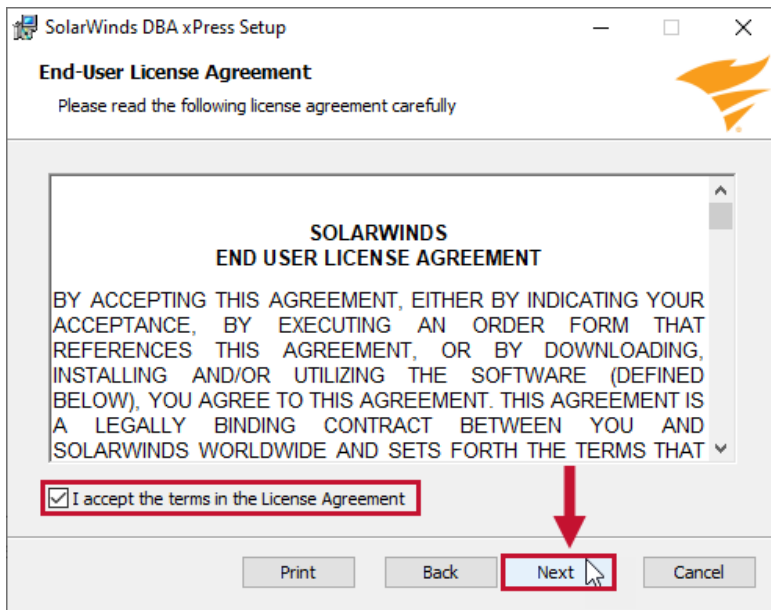

Installing DBA xPress

Complete the following steps to install DBA xPress on your machine:

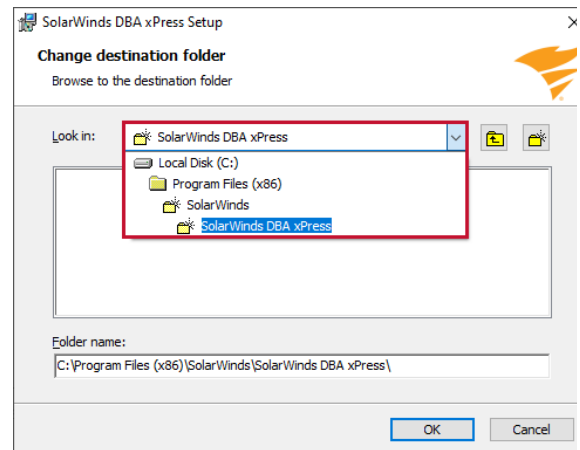

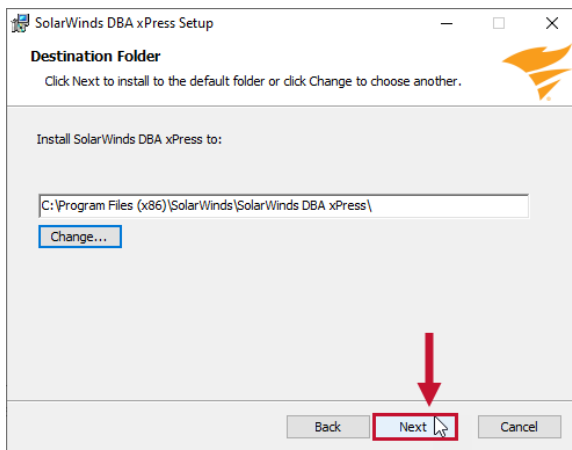

1. Run the **DBAxPress.installer** installation file to display the Installation wizard. Select **Next** to begin the setup process.

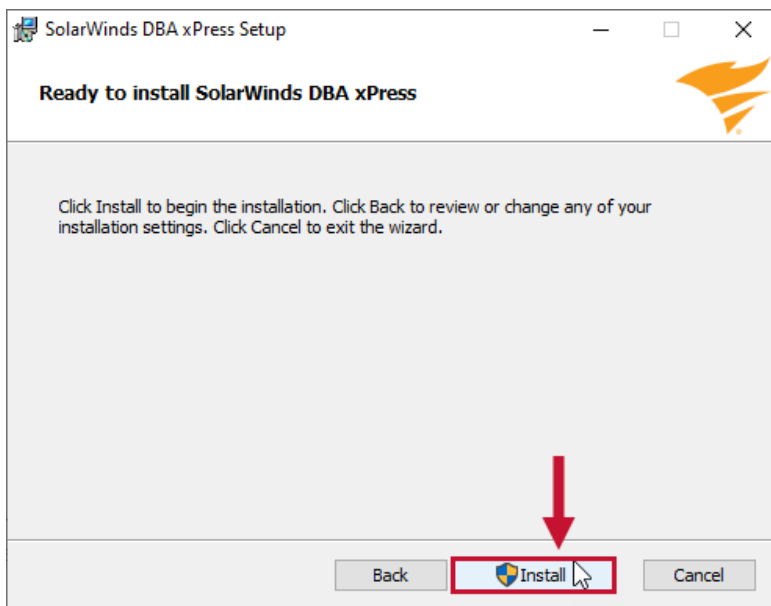

2. Select **I accept the terms in the License Agreement**, then select **Next** to continue the installation.

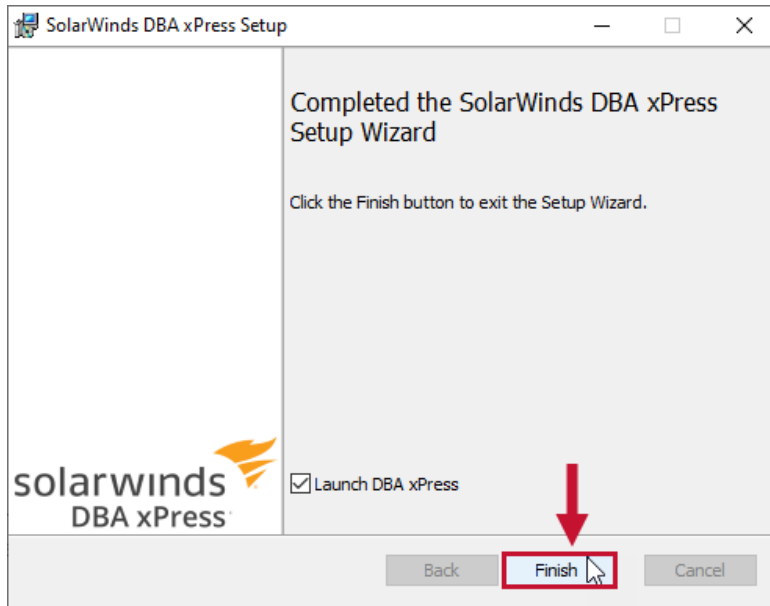

3. Select where you want DBA xPress to be installed. The default installation folder is C:\Program Files (x86)\SolarWinds DBA xPress\. Select **Next** to use the default installation folder or select **Change** to enter a custom destination folder and then select **Ok** to confirm your selection.

4. Select **Install** to begin the installation.

5. Select **Finish** to close the **DBA xPress Setup** window, and open DBA xPress.

🎉 **Success:** Your DBA xPress Installation is ready to use!

See the [DBA xPress training course](https://courses.sentryone.com) (Home > Courses > Data DevOps > DBA xPress) on courses.sentryone.com for free video training.
