

Database Mapper Power BI

Last Modified on 15 July 2021

Update: SentryOne Document is now SolarWinds Database Mapper (DMR). See the [Database Mapper product page](#) to learn more about features and licensing. Want to explore Database Mapper? An [interactive demo environment](#) is available without any signup requirements.

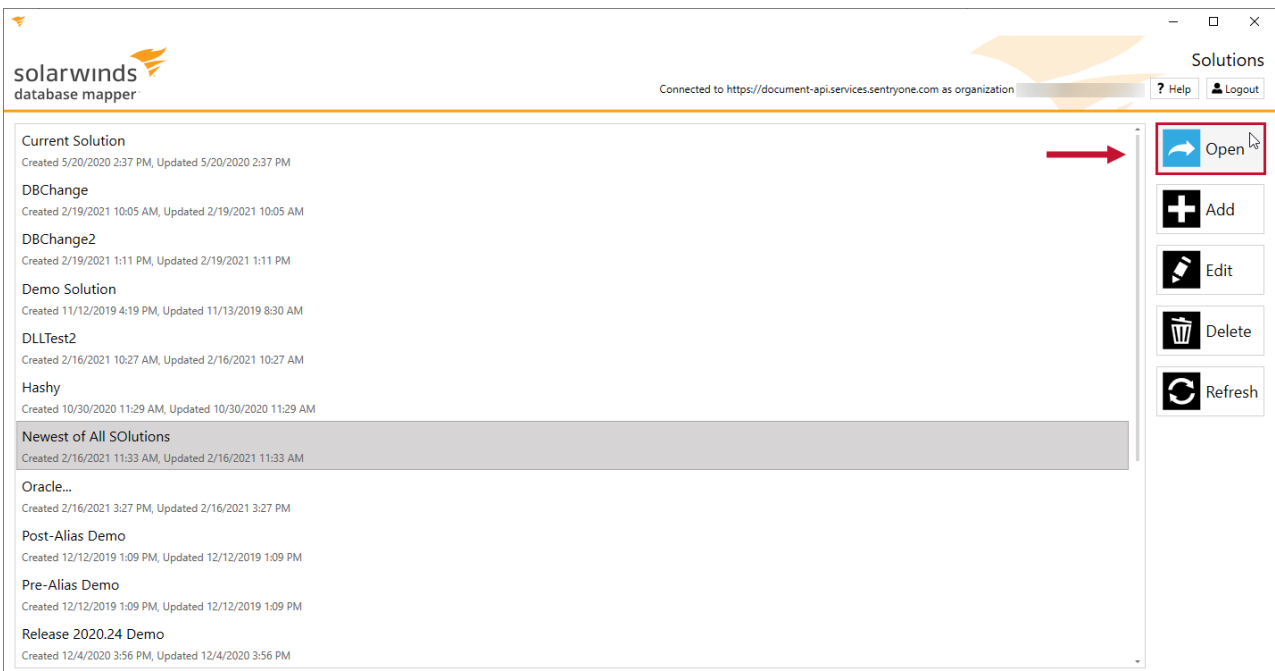

Power BI

Solution Item Icon	Solution Item Description
	SolarWinds Database Mapper allows you to document the Power BI Files, Folder, or Azure components in your environment.

Adding Power BI

Add a Power BI solution item by completing the following steps:

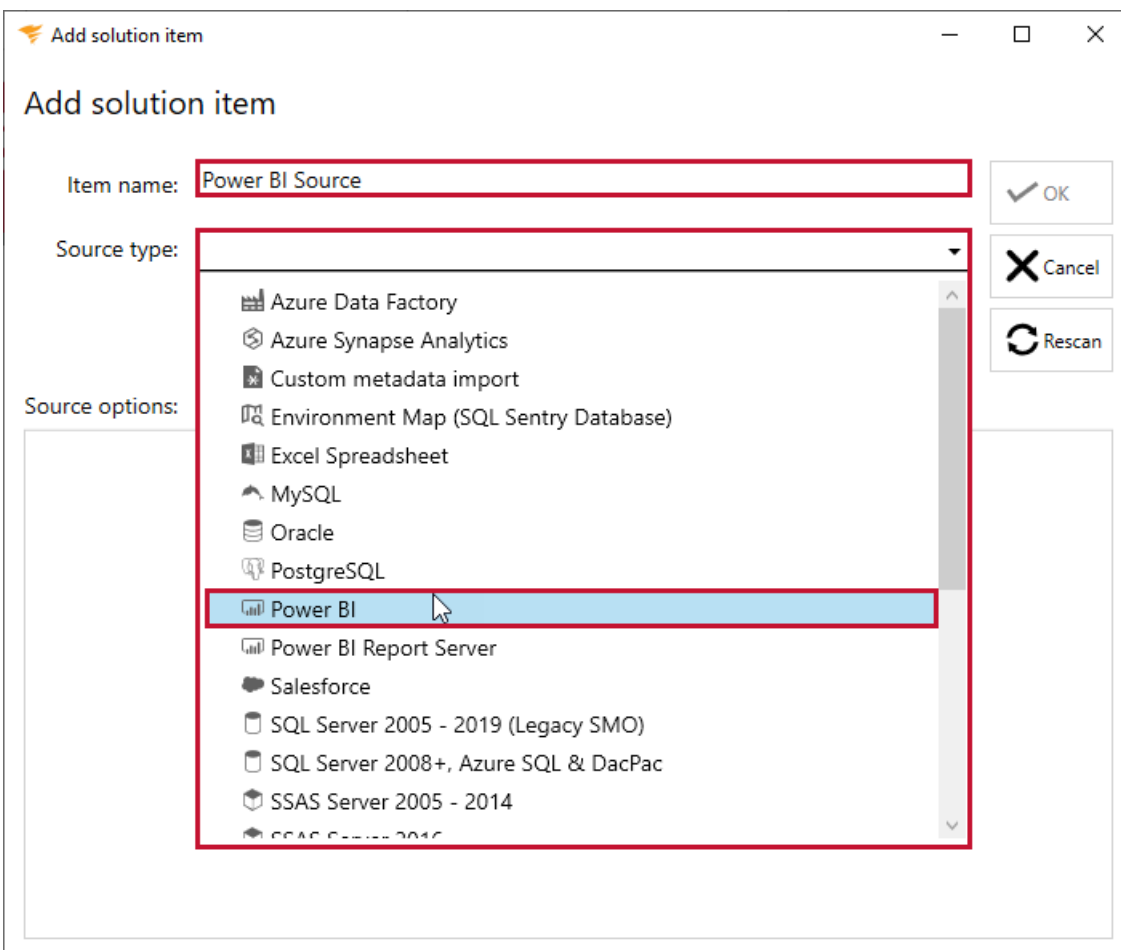

1. Select **Add** to add a new solution, or select **Open** to open an existing solution in the Database Mapper Configuration tool.

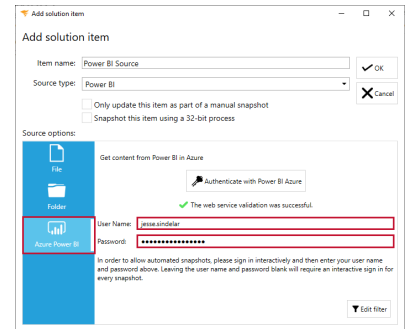

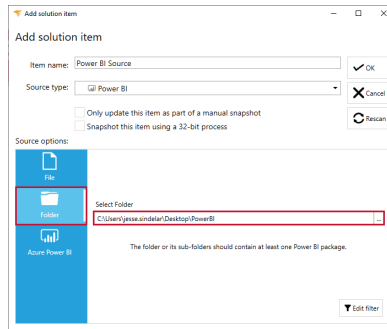

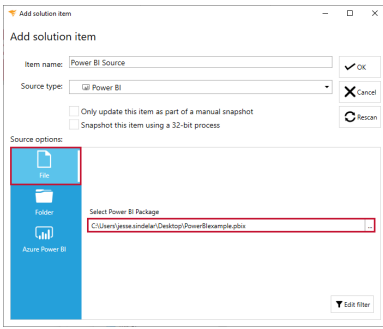

2. Select **Add** to open the **Add Solution item** window.

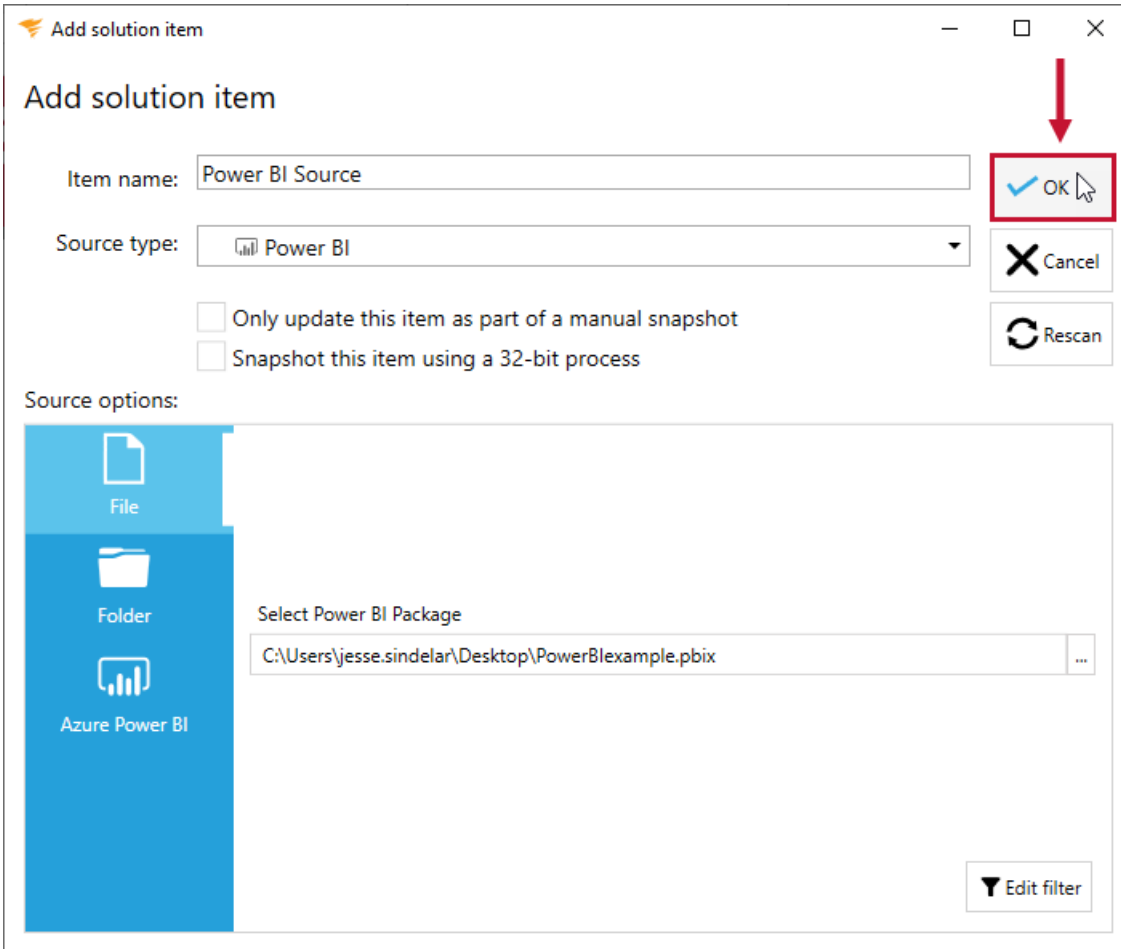

3. Enter an **Item name**, then select **Power BI** from the **Source type** drop-down list.

4. Select the Power BI **File, Folder**, or **Azure Power BI**.

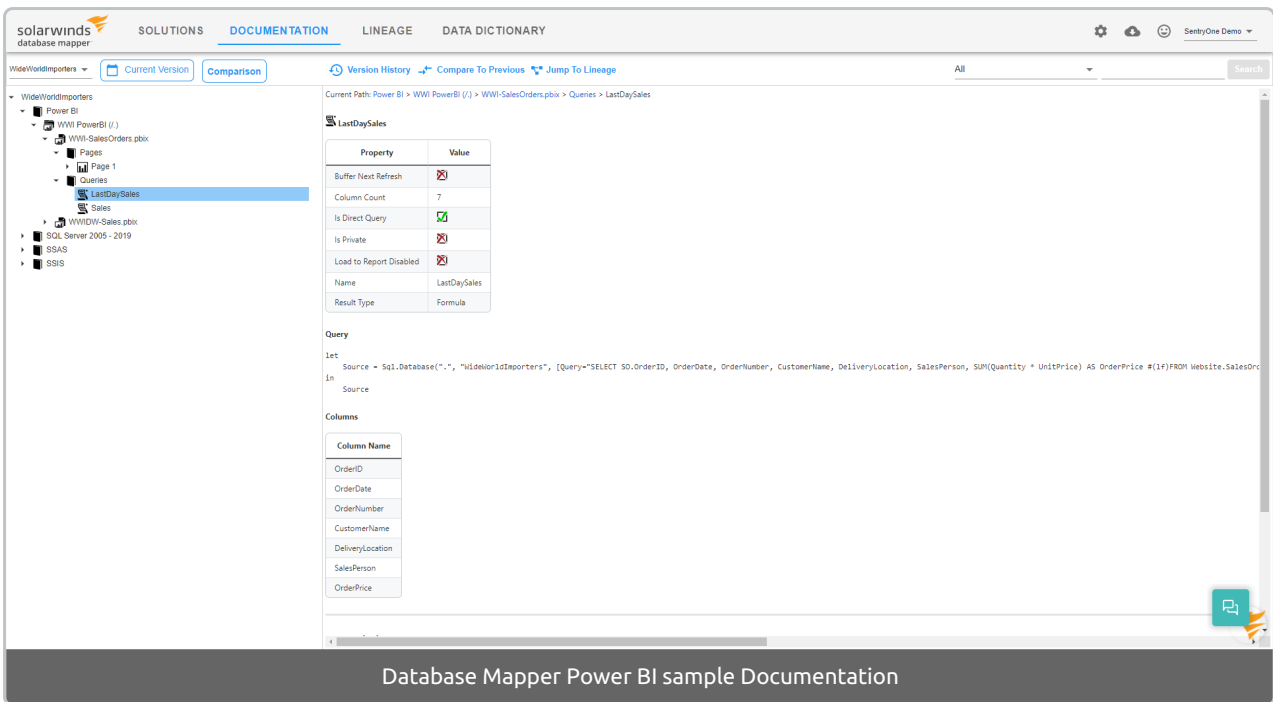

5. Select **OK** to add the Power BI solution item to your Database Mapper solution.

Power BI Solution Item Sample Documentation

[Additional Information](#): You need to take a snapshot of your solution and Power BI solution item before viewing any documentation or lineage. For more information about taking a snapshot, see the [Generating Documentation and Scheduling a Snapshot](#) articles.

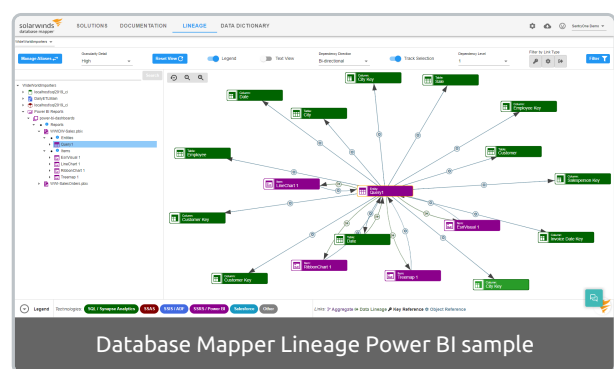

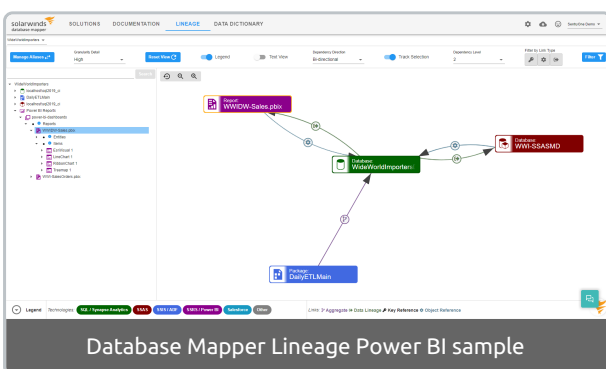

After adding a solution with your Power BI solution Item, and taking a snapshot, you are ready to view your documentation.

[Additional Information:](#) For more information about the Documentation tab in Database Mapper, see the [Documentation](#) article.

Power BI Solution Item Sample Lineage

After adding a solution with your Power BI solution item, and taking a snapshot, you are ready to view your solution's lineage within the environment. **Lineage** provides some of the same options on the nodes, but displays graphs and dependency flows of the information and connections. You can adjust the granularity or apply filters.

[Additional Information:](#) For more information about the Lineage tab in Database Mapper, see the [Lineage](#) article.

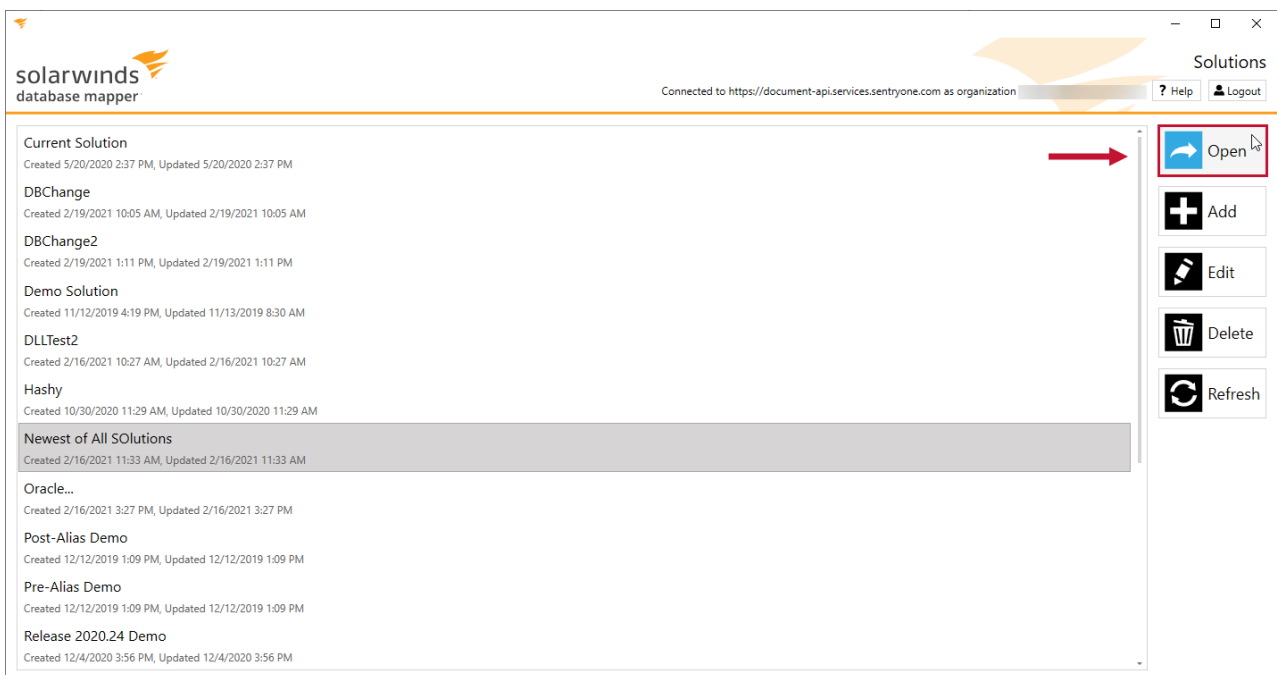

Power BI Report Server

Solution Item Icon	Solution Item Description
	<p>SolarWinds Database Mapper allows you to document the Power BI Report Server components within your environment. See the System Requirements article for details on prerequisites.</p>

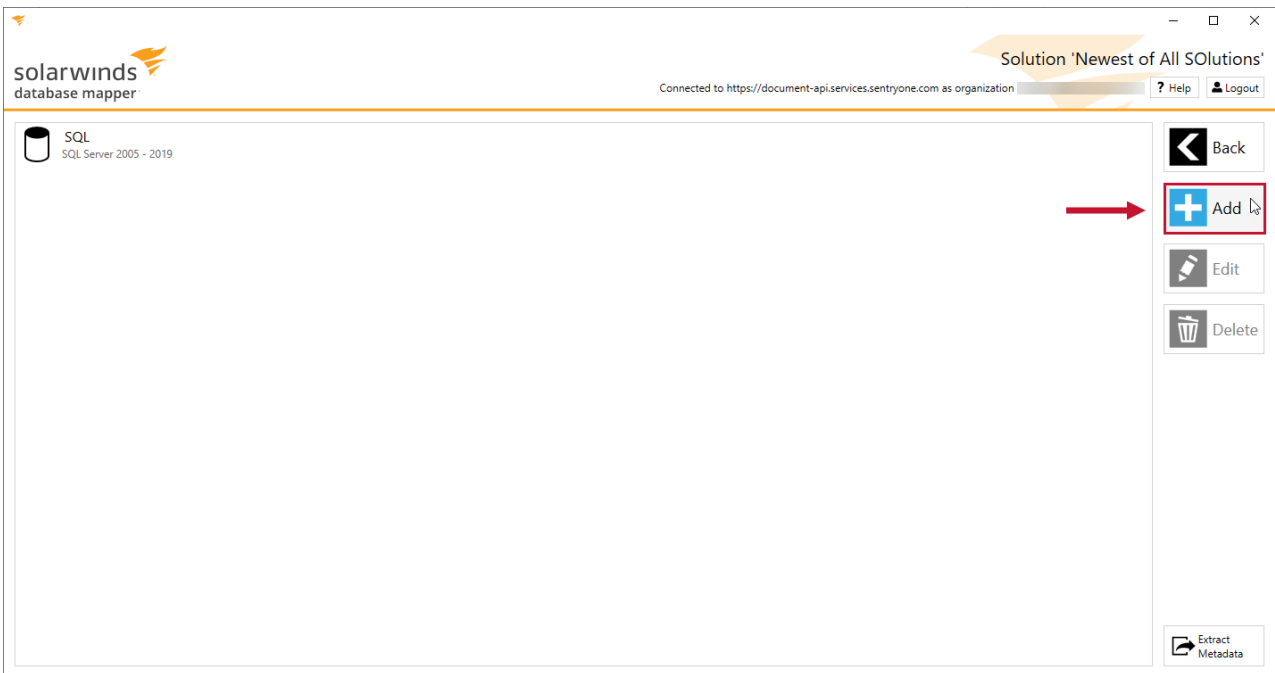

Adding Power BI Report Server

Add a Power BI Report Server solution item by completing the following steps:

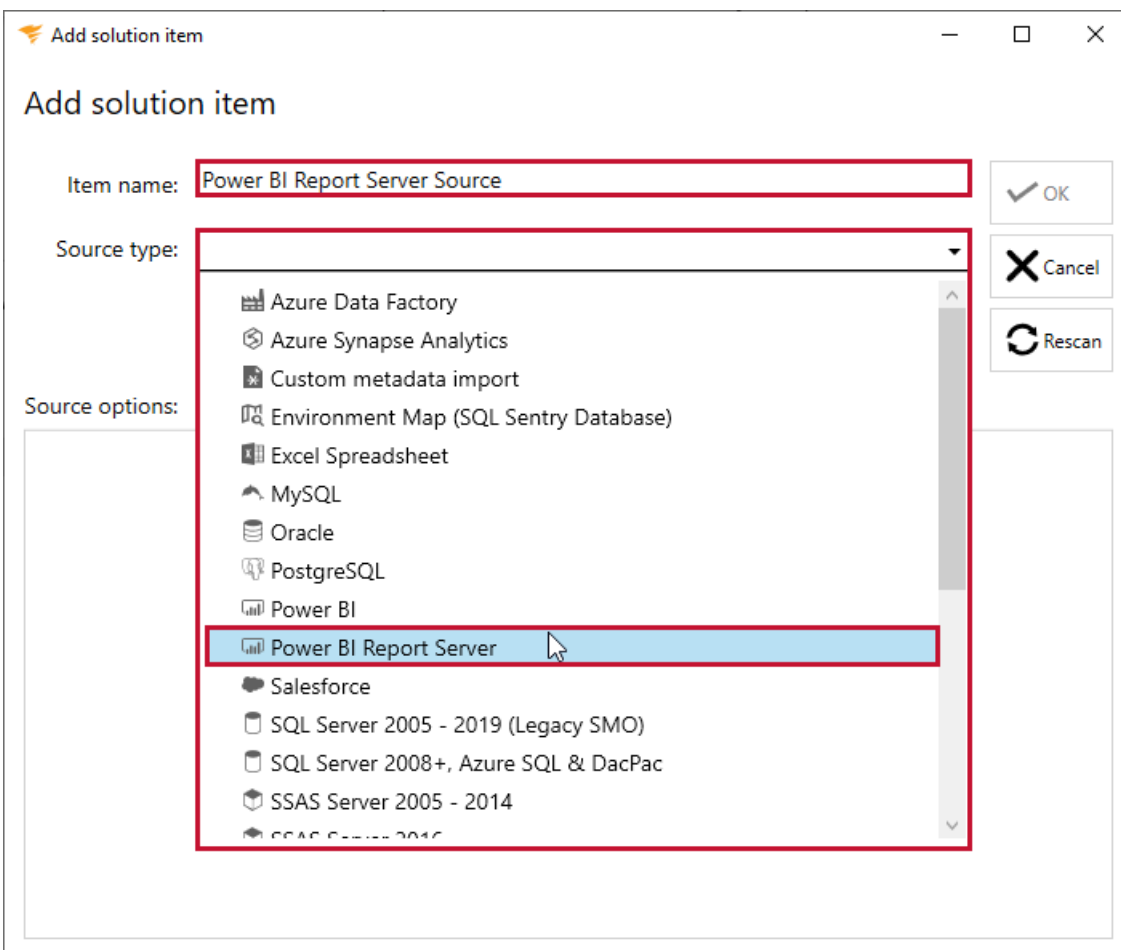

1. Select **Add** to add a new solution, or select **Open** to open an existing solution in the Database Mapper Configuration tool.

2. Select **Add** to open the **Add Solution item** window.

3. Enter an **Item name**, then select **Power BI Report Server** from the **Source type** drop-down list.

4. Enter the Power BI Report Server URI in the **Server URI** box, then select **Validate** to verify the connection.

Add solution item

Item name:

Source type:

Only update this item as part of a manual snapshot
 Snapshot this item using a 32-bit process

Source options:

Power BI Report Server

Enter the URI of the Power BI Report Server

Server URI:

5. Select **OK** to add the Power BI solution item to your Database Mapper Solution.

Add solution item

Item name:

Source type:

Only update this item as part of a manual snapshot

Snapshot this item using a 32-bit process

Source options:

Power BI Report Server

Enter the URI of the Power BI Report Server

Server URI:
