

# Database Mapper Tableau Server

Last Modified on 15 July 2021

**Update:** SentryOne Document is now SolarWinds Database Mapper (DMR). See the [Database Mapper product page](#) to learn more about features and licensing. Want to explore Database Mapper? An [interactive demo environment](#) is available without any signup requirements.

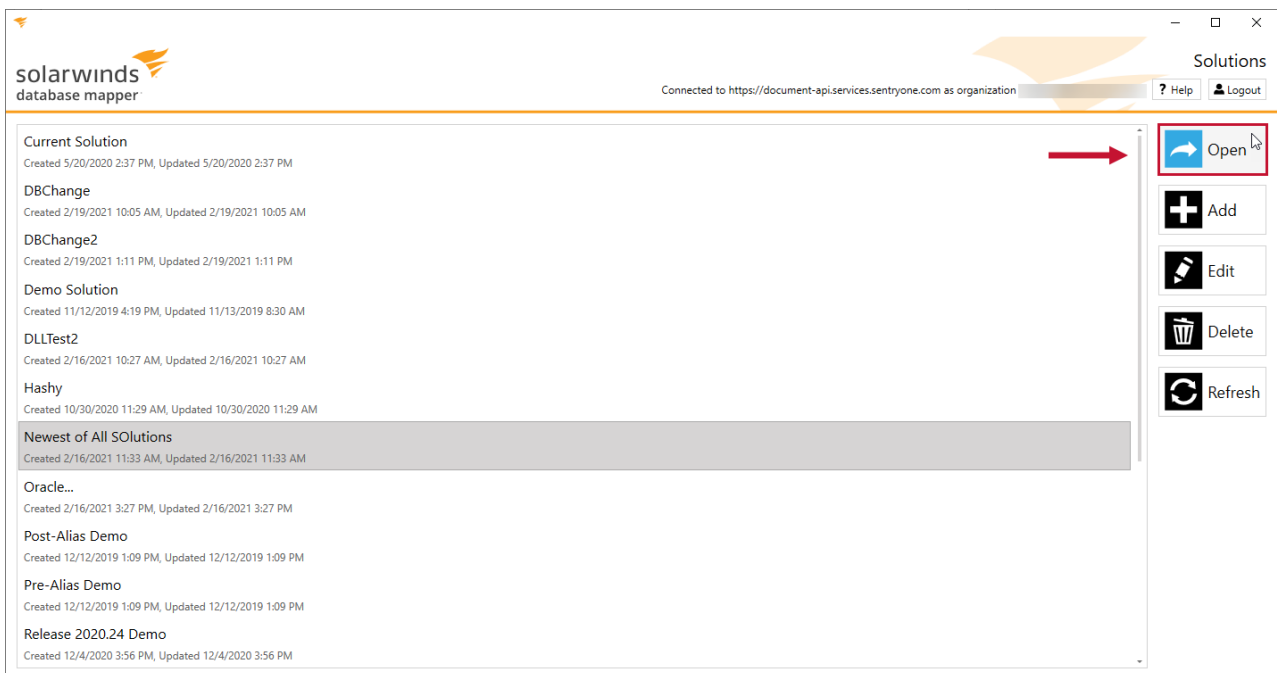

## Tableau Server

| Solution Item Icon  | Solution Item Description  |
|---|--|
|  | SolarWinds Database Mapper allows you to document databases across major versions of Tableau Server. See the <a href="#">System Requirements</a> article for details on prerequisites. |

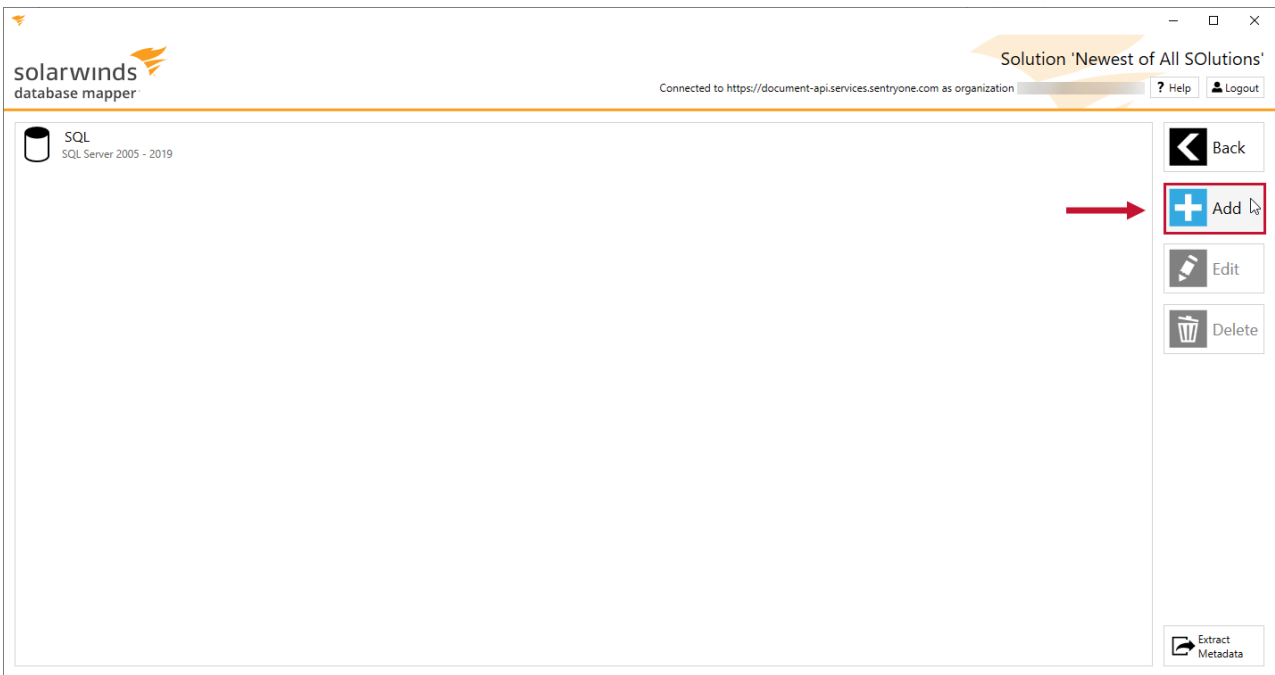

## Adding Tableau Server

Add a **Tableau Server** Solution item to your Database Mapper Solution by completing the following steps:

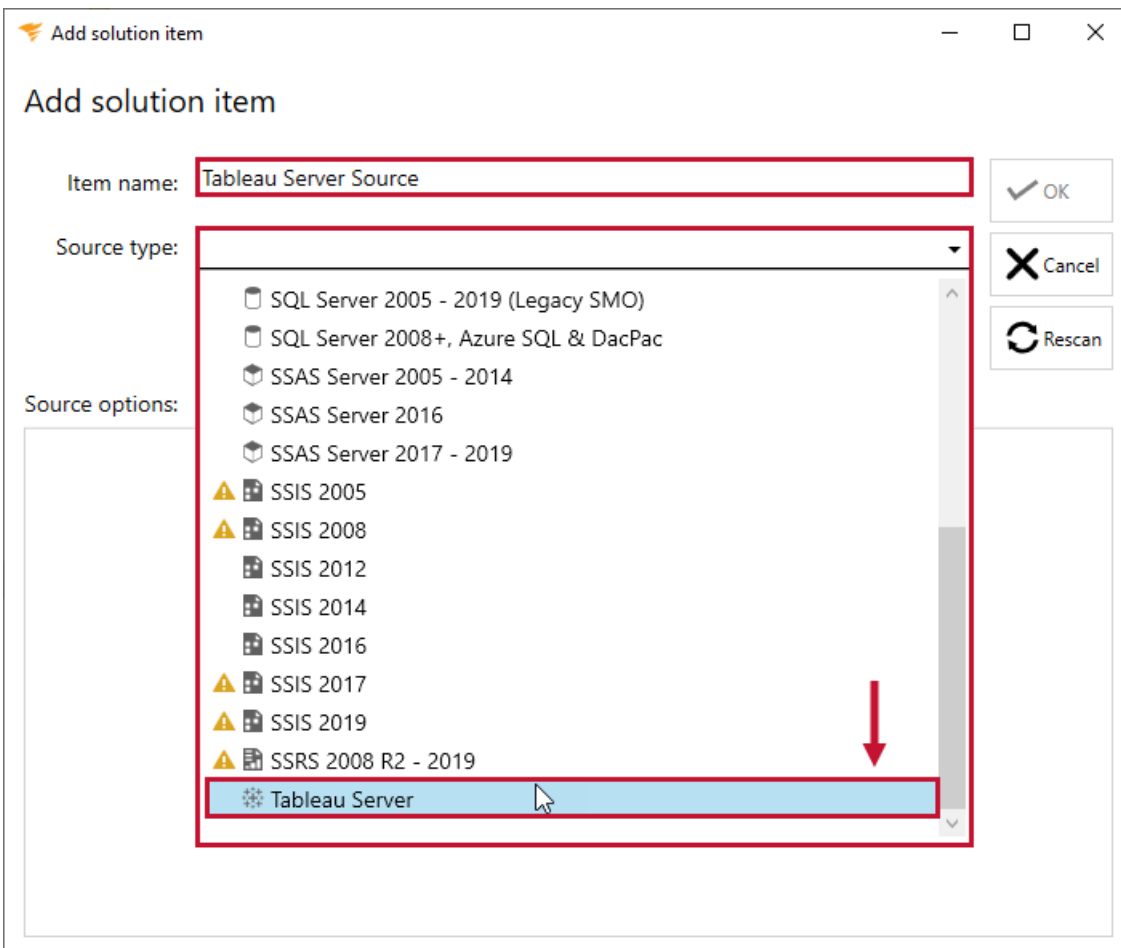

1. Select **Add** to add a new Solution, or select **Open** to open an existing solution in the Database Mapper Configuration tool.

2. Select **Add** to open the Add Solution item window.

3. Enter an item name, and then select **Tableau Server** from the Source type drop-down list.

4. Enter your valid server name, and connection credentials.

**Add solution item**

Item name:

Source type:

Only update this item as part of a manual snapshot

Snapshot this item using a 32-bit process

Source options:

**Tableau Server**

Server URL: 

Username:

Password:

**Server URL Syntax** : *http[s]://<ServerName>[:<Port>]*

**Username** : *The user specified above must be a server administrator*

**⚠ Important:** The credentials used to connect to the Tableau Server must be assigned the **Server Administrator** role.

5. Select **OK** to add the Tableau Server Solution item to your SDatabase Mapper Solution.

**Add solution item**

Item name:

Source type:

Only update this item as part of a manual snapshot

Snapshot this item using a 32-bit process

Source options:

**Tableau Server**

Server URL: 

Username:

Password:

**Server URL Syntax** : *http[s]://<ServerName>[:<Port>]*

**Username** : *The user specified above must be a server administrator*

**Additional Information:** You need to take a snapshot of your Solution and Tableau Server Solution item before viewing any documentation or lineage. For more information about taking a snapshot, see the [Generating Documentation](#) and [Scheduling a Snapshot](#) articles.

After adding a Solution with your Tableau Server Solution Item, and taking a snapshot, you are ready to view your [documentation](#) and [lineage](#) within the environment.
