

# Database Mapper Oracle

Last Modified on 15 July 2021

**Update:** SentryOne Document is now SolarWinds Database Mapper (DMR). See the [Database Mapper product page](#) to learn more about features and licensing. Want to explore Database Mapper? An [interactive demo environment](#) is available without any signup requirements.

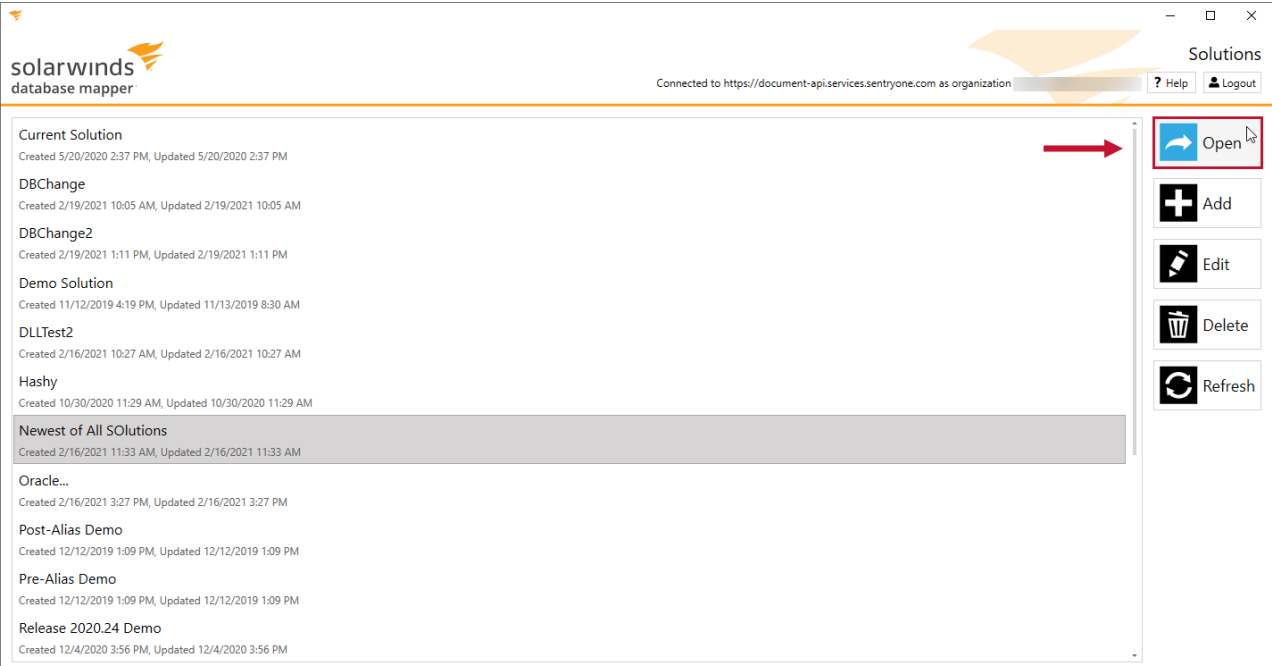

## Oracle

Solution Item Icon	Solution Item Description
	<p>Database Mapper allows you to document databases across major versions of Oracle. See the <a href="#">System Requirements</a> article for details on prerequisites.</p> <p><b>Note:</b> Oracle is a database-level provider. Lineage is not generated for this solution item type.</p>

## Adding Oracle

Add an **Oracle** solution item to your Database Mapper solution by completing the following steps:

1. Select **Add** to add a new solution, or select **Open** to open an existing solution in the **Configuration Tool**.

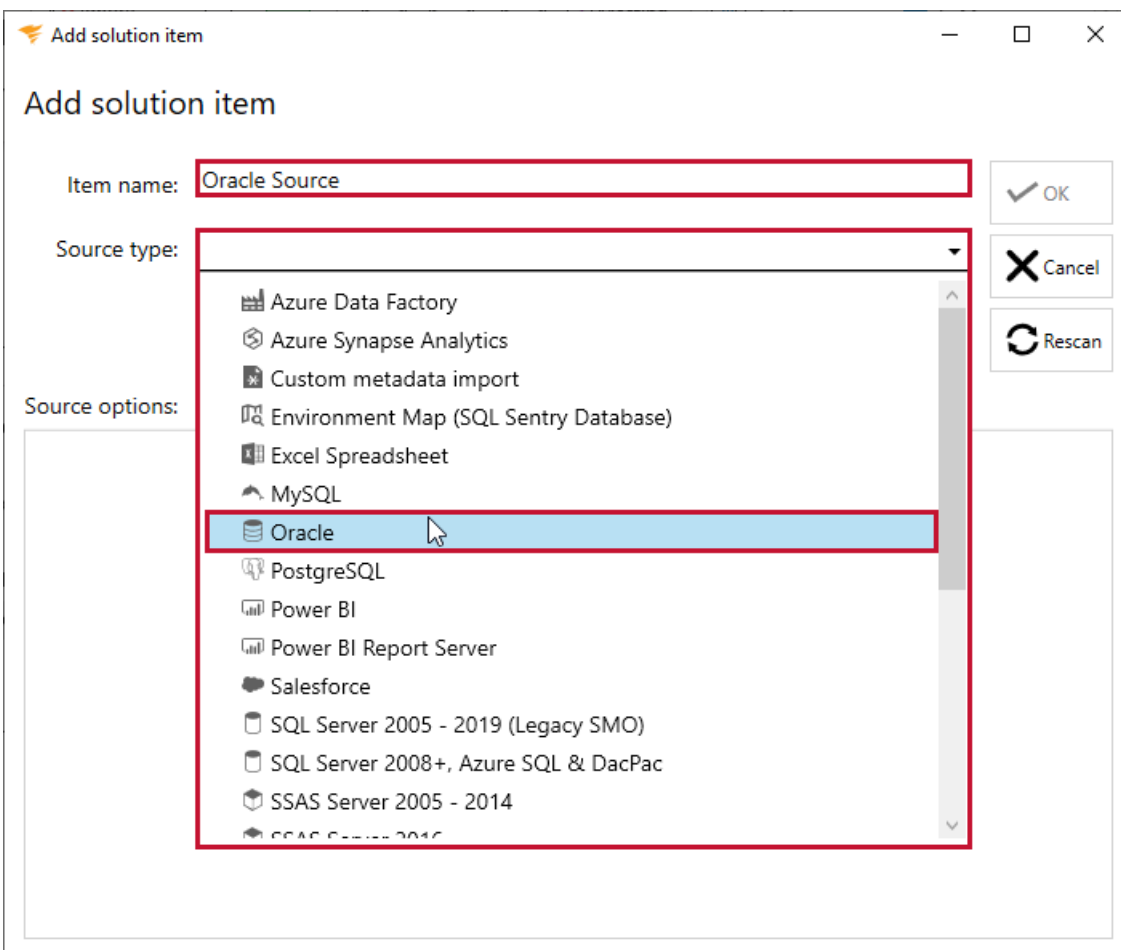

The screenshot shows the SolarWinds Database Mapper web interface. The top navigation bar includes the logo, a connection status, and user options. The main content area displays a list of solutions with columns for name, creation time, and update time. On the right side, there is a vertical toolbar with buttons for 'Open', 'Add', 'Edit', 'Delete', and 'Refresh'. A red arrow points to the 'Open' button, which is highlighted with a red box.

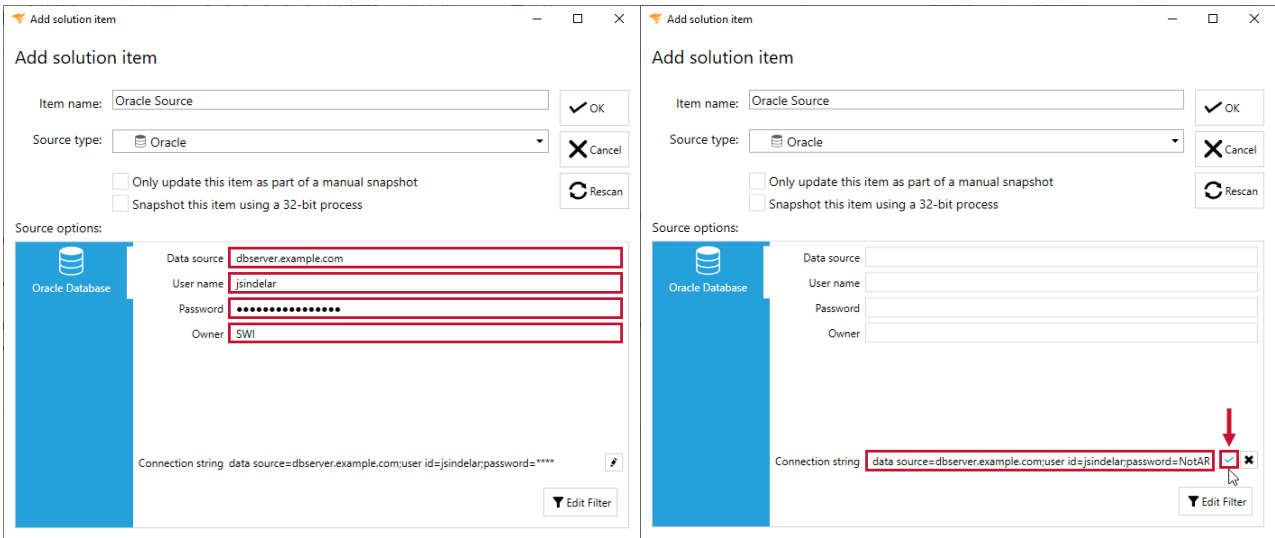

2. Select **Add** to open the **Add Solution item** window.

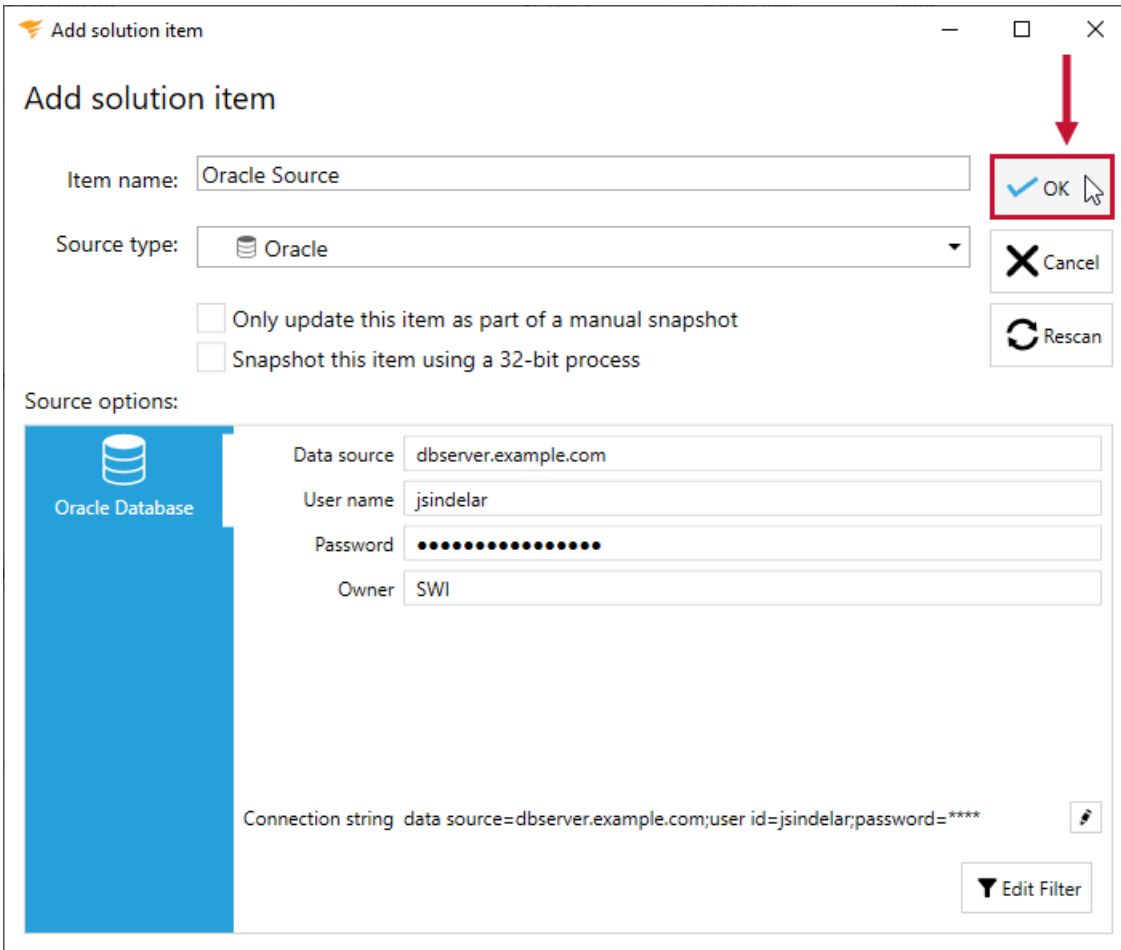

3. Enter an item name, then select **Oracle** from the **Source type** drop-down list.

4. Select **Oracle** then enter a valid connection string. You can either copy and paste a connection string into the **Configuration Tool** or edit the individual values.

5. Select **OK** to add the **Oracle** solution item to your Database Mapper solution.

## Oracle Solution Item Documentation

[Additional Information](#): You need to take a snapshot of your solution and **Oracle** solution item before viewing any documentation. For more information about taking a snapshot, see the [Generating Documentation and Scheduling a Snapshot](#) articles.

After adding a solution with your **Oracle** solution item, and taking a snapshot, you are ready to view your documentation.

[Additional Information:](#) For more information about the Documentation tab in Database Mapper, see the [Documentation](#) article.
